

## IEEE Sensors Council Distinguished Lecturer Program

### Duties of a [Distinguished Lecturer](#)

1. Serve as an Ambassador of the Sensors Council, promoting the field of Sensors, the Council, and IEEE.
2. At lecture events encourage young professionals and students to pursue IEEE membership.
3. Arrange and present at least two lectures per year, ideally more.
4. Respond to press inquiries pertinent to the area of sensors, if so requested by the Council's ExCom.
5. Interact with the Council's relevant Technical Committees.
6. Promptly submit expense reports (if travel is funded by the Council), semi-annual reports to VP-TA on interim activities, and at the end of the DL's term, a summary report for the IEEE Sensors Newsletter.
7. The DL should minimize travel expenses to the extent possible, by seeking low cost air fare and combining multiple talks within a given geographic region during a given trip – e.g., a USA-based DL should not travel to Asia to present a single lecture.
8. Adhere to the [IEEE travel policy and guidelines](#).
